Full right to work in the UK. No sponsorship required.

PROFILE

Junior UX/UI designer with a Professional Diploma from UX Design Institute and a three-month internship at a Canadian pet care startup, where my checkout and plans designs went through internal design review and on to development. I work from interviews and testing to developer-ready Figma screens. Four years in hospitality taught me to notice where people get stuck and fix it quickly.

EXPERIENCE

UX/UI Design Intern
TiriVelo, pet care marketplace (Canada, remote) · Jun 2026 – Sep 2026

- Ran a team UX audit of the existing web product and helped prioritise the issues it found.
- Redesigned booking and checkout: full price upfront with taxes, fees explained, one clear next step.
- Designed payment methods, saved cards and edge cases: invalid details, expired cards, leaving checkout.
- Redesigned the subscription plans page and the pet owner profile.
- Presented options and trade-offs in weekly stakeholder reviews with the team lead and founder.

Assistant Manager
Prince of Wales Pub, London · Jan 2024 – Present

- Run reservations and daily operations, lead a team of six on busy shifts and train new staff.
- Deal with guest complaints and feedback on the spot, working out what actually went wrong before fixing it.

Bartender, Team Lead
Magnateria, Kraków, Poland · 2022 – 2024

UX PROJECTS

RoomScout, London room rental website
Concept project, responsive web · roomscout.netlify.app · 2026

- Ran desk research on SpareRoom, OpenRent, Rightmove and Zoopla and found a gap: no one combined rooms checked in person with all-in prices.
- Designed a search-first page with an all-in budget histogram, move-in calendar and filters, plus room cards with a price breakdown and a three-step viewing booking.
- Shipped it as a live responsive site: 100 for Accessibility, Best Practices and SEO in PageSpeed.

DriveNow, car rental app redesign
UX Design Institute diploma project, iOS · 2025

- Ran usability tests and interviews on existing car rental apps; grouped findings with affinity mapping.
- Mapped the user flow and customer journey, then moved from paper sketches to wireframes and a mid-fidelity Figma prototype.
- Ran a second round of testing and fixed what it found (time picker, keyboard types) over three iterations.

EDUCATION

Professional Diploma in UX Design · UX Design Institute · 2026
40 SCQF credits at Level 8, credit-rated by Glasgow Caledonian University

UI web design and AI tools course · Oleksandr Ponomarenko · 2026

CertHE Business Skills for the Workplace (Merit) · University of Wales Trinity Saint David · 2025
